PROFESSIONAL SUMMARY

Associate Software Developer with hands-on experience in Python development, REST APIs, database management, and software development lifecycle. Currently working at Ken Infosystems, developing and maintaining enterprise applications, debugging production issues, and implementing new features. Strong foundation in OOP, SQL, Git, and Agile methodologies. Additionally experienced in Java, Spring Boot, React.js, and full-stack application development.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, HTML/CSS | **Frameworks & Libraries:** Spring Boot, Spring Security, ReactJS, REST APIs, Microservices, Django, Bootstrap | **Databases:** MySQL, MongoDB | **Tools & Practices:** Git & GitHub, Maven, Agile Development

WORK EXPERIENCE

Associate Software Developer | Ken Infosystems | May 2026 - Present

- Built the Bot Management module of ChatBizz AI (an AI support chatbot platform) with React.js, Bootstrap 5 and custom CSS: bot list with search and filters, validated create/edit forms, and confirmed publish, pause and delete flows
- Developed a reusable component library (modal, toast, confirm dialog, status badge, action menu, sidebar) shared across screens, and implemented role-based access and plan-limit states from the product requirements
- Designed a mock service layer mapped to REST endpoints so screens connect to the backend by changing only the service functions, with loading, empty, success and error states on every screen
- Implemented bot version history with restore and side-by-side comparison, plus a test chat for trying a bot before publishing
- Wrote end-to-end tests with Jest and React Testing Library covering the bot lifecycle, search and filtering, and the test chat

PROJECTS

AI Chatbot | Java, SpringBoot, Gemini Api, Spring AI | Jan 2026

- Developed an AI-powered chatbot using Spring Boot and Spring AI, integrating the OpenAI API to deliver context-aware responses with sub-2-second average response time during testing.
- Engineered prompt templates and conversation history management, improving response relevance and maintaining contextual accuracy across multi-turn conversations.
- Designed and implemented RESTful APIs for chatbot communication, reducing frontend-backend integration effort by enabling seamless data exchange.

Ironpass: Dynamic Password Strength Analyzer | React Js | Axios | Genrtr Api | Mar 2025

- Developed a password generation and strength analysis application using React.js, allowing users to generate secure passwords based on custom preferences and PIN inputs.
- Integrated a password generation API to generate strong randomized passwords up to 20 characters long, improving password security.
- Implemented real-time password strength validation, providing instant feedback and encouraging stronger password creation.

INTERNSHIP

Backend Developer | Greateway Software Pvt. Ltd | Sept 2025 - Feb 2026

- Contributed to a Loan Management Application, developing Java/Spring Boot features under senior guidance
- Fixed bugs and enhanced existing modules to improve application stability
- Worked with REST APIs, controllers, and database operations

EDUCATION

B.Tech | Alliance University, Bangalore, Karnataka | 2025 | Diploma | Government Polytechnic Kharsawan, Saraikela-Kharsawan, Jharkhand | 2022 | Class X | DAV Public School, Adityapur, Jharkhand | 2019

CERTIFICATION

Machine Learning For All | University of London | Sept 2023 | Developing Front-End Apps with React | IBM | Mar 2024 | Capstone React App | Meta | Mar 2024 | Database Structures and Management with MySQL | Meta | Jun 2025 | Full Stack Java Development | Fusion Software Institute | Dec 2025
